  Completed 4 month ALX Software Engineering Program in Front-End Web development.

  Participated in intensive training of coding in HTML, Javascript, CSS and other libraries like React.js and Tailwind CSS.

  Built responsive websites.

- **ALX Professional foundations certificate - September 2024**
  Completed 2 months of professional development skills for the digital age.

  Developed both soft and hard skills including leadership, collaboration, communication, critical thinking, problem solving and technical skills like AI tools and project management.

TECH STACKS

- JavaScript
- React.js
- HTML5
- CSS3
- Git and Github

PROJECTS

- **Portfolio website**
  React | CSS modules | GitHub pages

  Built a personal portfolio website showcasing front end projects. Implemented mobile first responsive design and smooth navigation using React Router.

  Live Demo:
  GitHub:
- **Movie Database App**
  React | CSS | TMDb API

  Built a responsive web application that all allows users to search for movies, view detailed information and explore trending titles. Include features such as dynamic search, ratings, movie posters,movie dates fetched in real time from the TMDb API. Styled with custom CSS for a clean Morden UI.
